#### STRATEGY STATEMENT

The school serves an area of high social deprivation with over 50% of pupils eligible for the pupil premium. The school is committed to addressing barriers to learning faced by pupils and ensuring that social disadvantage does not limit opportunities to succeed.

- In recent years, strategies to improve emotional wellbeing of disadvantaged pupils have proved effective. The use of ELSA workers in school to support targeted pupils has impacted positively as has the use of Rising Stars to provide specialist support for pupils with behavioural difficulties. Employing a specialist maths teacher to co-ordinate maths intervention and provide additional teaching support has diminished the progress gap between disadvantaged pupils and non disadvantaged nationally. As a result, these strategies will continue to form part of the school strategy going forward.
- Strategies to improve progress in English, including phonics, reading and spelling have been less effective in recent years and therefore the school has adopted a different model to address barriers to learning faced by disadvantaged pupils in English. Reading progress has been slow for disadvantaged pupils and the introduction of the Read Write Inc programme will be a key strategy this year for securing the required phonic knowledge and addressing reading fluency issues throughout the school. This will include full training for all staff, targeted teaching and intervention for any pupil at risk of falling behind, the Fresh Start intervention programme in Year 5/6 and the adoption of the spelling programme.
- The Pupil Premium plan will complement the catch up strategy to address gaps in learning caused by the global coronavirus pandemic.
